Kamerah

Whether it's a webcam recording app, video editor, or anything in between, Kamerah makes it incredibly easy to edit and publish what you shoot. Key features: Record live video using the built-in webcam on your device Capture video, audio, and a snapshot every time you press the record button Set your default webcam for future sessions Set your webcam color settings, frame rate, quality, and more Highlight and crop regions of interest Edit videos and images individually Annotate photos, edit captions, and add logos Apply filters Produce short videos Optimize videos for playback on all devices Other settings like size, quality, bit rate and more are adjustable Set filter parameters and save it as a preset Tap to start or stop View recoding history Capture preview images with a single tap Share the captured media or directly the app via an email. Download Kamerah from Google PlayStore. “I’m a workaholic & I work from home” – You’re a modern day workaholic – The more work you put in, the more you get out. Having a simple approach to work is extremely difficult for some people. Building meaningful relationships at work is tough especially if you are working for yourself. You can be successful if you have the right attitude. So, here are the top tips to get things done at work, set your desk up effectively and get work done. Tip #1: Start the day right The first thing you do at the end of the day is the first thing you should start the next day. Set yourself up to be effective the whole day long. Tip #2: Dedicate time Your first task the morning should be to get organized and get things done. You should be able to dedicate 30 minutes out of your day, be it on a weekend or day off, to get things done. Tip #3: Prioritize When you are in a rush, it is easy to get confused and be unable to decide what to do first. You have to prioritize your tasks to manage your workload, which should be to: o Research and finalize your project before starting the next one. o Start with the easy stuff. o Release them. Tip #4: Get organized You may be lucky to have a large desk or a desk with a single place to sit at, but, in most cases, people’s desks are

What's New In Kamerah?

Kamerah (Kam3r.ah) is a Webcam recorder and streamer. Kam3r.ah supports almost all webcams on current and past Unix based machines. It supports both analog Webcams and IP Webcams (including Intel and WM/Intel). It supports many MS Windows based machines, too. Kam3r.ah is free and open source, but it is extremely limited due to the way it is implemented. The goal is not to make a very complete program, but rather a simple and complete program. Features: Capture, view, stop and start webcam video. Get stream properties of a video, including resolution, size, fps, bitrate,... Encoding for streaming video to others, especially HTTP or STREAM protocols. Export stream to a file in any format (MPEG-1, MPEG-2,...), or copy a stream to another player. Encoding with compression like JPEG, MS JPG or other (LZMA,...) Delay stream for encryption (Digipeater), which makes Kam3r.ah very useful in transmitting encrypted webcam streams to other hosts. Ability to view and control a webcam remotely. View and control a webcam remotely (DSL, HTTP) via standard web browser or your IM clients. Ability to use a browser or a web interface to help you manage your webcam and videos. Browse images to view in real-time or on screen. Select a webcam from a list of webcams. Run VideoDownloader (Kam3r.ah is designed to be run from command line) as a service. Run VideoRecorder as a service. Run a set of multiple VideoRecorders, each of which is running independently. Run multiple VideoRecorders and assign them specific IP, port or domain name to help with identifying the webcam in your local network. Support MS Windows and most Linux based (GNU/KFreeBSD,...) machines. Compilation for 32-bit and 64-bit machines. Here's a feature list of Kam3r.ah: * Interact with a webcam * View the webcam and its stream properties * Turn on or off the webcam * Control the webcam * Move the webcam (pan, zoom,...) * Save still images or movies from the stream * Stop or resume streaming * Use an active webcam filter/effect *
